

SOLARGARD®

RESTORATION ACRYLICS THAT STAND ABOVE THE REST.

TREMCO
ROOFING & BUILDING MAINTENANCE

SOLARGARD

THE SOLARGARD FAMILY

When it comes to acrylic coating systems, Tremco's Solargard systems are the ideal choice for roofs and walls that need complete weather-proofing and beautification. Unlike other acrylic products that are formulated to meet a price point, the Solargard systems have been developed to meet contractors' and building owners' specific needs.

Solargard offers options such as fibered or non-fibered products that allow you to select the coating that is best suited for your job. Backed by a long history of success, Solargard products feature premium polymers that have proven themselves under all conditions.

Solargard's unique formulation allows for a quick and trouble-free application, so you'll save on labor costs and job time.

Building owners will be delighted with Solargard, as well. These products seal the surface, effectively guard against leaks and ultraviolet radiation and reflect solar heat away from the surface before it is absorbed. The surface temperature and building interior stay cooler and energy use can be reduced.

SOLARGARD HY-BUILD PROTECTS METAL ROOFS & WALLS IN A SINGLE COAT.

For building owners who want to restore and protect a metal roof or masonry wall, Solargard Hy-Build is an excellent choice. It is a fibered acrylic coating that bridges small roof and wall surface imperfections and provides long-term waterproofing in a single coat. This workhorse of a coating also provides durability, low temperature flexibility, and excellent resistance to weathering and dirt pick-up. It's applied in four easy steps: powerwash the roof surface; spot prime rusted areas; coat fasteners and penetrations with Solargard Seam Sealer; and then simply spray or roll on Solargard Hy-Build.

- Unique formulation supports a one-coat application, eliminating pinholes
- Contains fibers that reinforce the coating while accommodating building movement
- One coat application cuts cost
- Reflective surface reduces energy costs
- Available in white, 16 standard and custom colors
- Excellent one coat option for masonry wall restoration
- 10- and 12-year material and labor warranties available

RESTORATION OR REPLACEMENT?

SOLARGARD 6083 RESTORES LOW SLOPE & METAL ROOFS.

This premium water-based, acrylic elastomeric roof coating is formulated to meet or exceed the standards set forth in ASTM D 6083. It's durable, flexible in low temperatures and offers excellent resistance to weathering and dirt pick-up over a variety of roofing substrates. These substrates include metal, weathered single ply, modified bitumen, polyurethane foam and smooth built-up roofs.

- FM Global, UL and Miami Dade approvals
- Available in white, 16 standard colors and custom colors
- Reflective surface reduces energy use
- 10- and 12-year material and labor warranties available

SOLARGARD ACRYTHANE THE BEST IN LOOKS AND PERFORMANCE.

Solargard Acrythane is a single component, water-based, acrylic urethane roof coating that can be directly applied to aluminum, galvanized and steel roofs. Solargard Acrythane is an excellent color coat over Solargard Hy-Build and Solargard 6083.

Solargard Acrythane provides a rich, semi-gloss finish coat, formulated for excellent color-fastness. It is easy to apply; offers excellent corrosion, humidity and UV resistance; and dries quickly. Solargard Acrythane helps minimize the formation of salts which may result in a frosted appearance. Solargard Acrythane does it all with low VOCs, and no odor.

- Great protection and color-fastness in a water-based formula
- Variety of color options including dark colors
- Excellent color retention

ROOF RESTORATION: A HOST OF IMPRESSIVE BENEFITS

- **Significantly lower overall cost**
- **Increased service life**
- **Less work, smaller crews, lower labor costs**
- **Quick and easy application**
- **Cold-application = safer, more productive workers**
- **No tear off; no landfill fees**
- **Cost effective over second roofing layer**
- **Restoration can usually be repeated**
- **Can help dramatically lower energy use**
- **Minimize business disruption**
- **Environmentally friendly**
- **Outstanding warranty protection**
