GET THE BEST PROTECTION UNDER THE SUN.

Want more return from your building investment? Look up. Your roof system is like the top of your head: you lose more energy through that space than through any other surface.

Tremco Roofing has more ways to extend – even double – your roof life, cut your energy use and maintenance costs, and protect against moisture infiltration than any other roof and wall coating company.

We have the widest range of restoration solutions for every roof type because we're committed to helping our customers manage their buildings' sustainability. We introduced the world to the money-saving benefits of restoration in 1928, and our customers have kept us on top ever since.

We are driven by a philosophy that values new ideas, hard work and real-world, cost-effective restoration solutions that help your building envelope last longer.

That's what makes us the leader in roofing and wall restoration.

*Tremco Incorporated
has been a leader
in manufacturing
restoration coatings
and systems
since 1928.*

MONEY-SAVING RESTORATION SOLUTIONS.

Whether your roof is asphalt coated, built-up or modified bitumen, concrete, metal, weathered single-ply or foam, Tremco Roofing has a solution that waterproofs it and saves you money in a variety of ways:

- Faster, easier installations with smaller crews and virtually no disruption for those using the facility
- Significant energy savings (The United States EPA states that cool roofs can save from 20-70% in annual cooling energy use.)
- Lower maintenance costs
- Restoration can often be covered in the current maintenance budget
- Exceptional warranty protection

Protecting your exterior walls with our waterproof coating does more than restore them to their original beauty. Our wall coating lasts two to three times longer than most paints, so it will keep your building looking great, years longer, while you save on painting costs and potential damage from leaks through the walls.

*There's an
ENERGY STAR®-
qualified restoration
system for every kind
of roof, which can
mean substantial
energy savings.*

SUPPORTING SUSTAINABILITY FOR OVER 80 YEARS.

Sustainability has become critical to facility owners and managers in recent years. And that's what has driven Tremco Roofing's philosophy of restoration since our founding.

Restoring your roof with one of our restoration systems rather than replacing it helps meet sustainability goals because:

- There is no tear-off, which eliminates landfill issues or fees
- Coatings are cost-effective over a second roofing layer, complying with building codes and postponing replacement for years
- Reflectivity reduces energy consumption and the strain on HVAC systems
 - Facilities are more comfortable
 - It extends the service life of structures for years
- The Urban Heat Island Index is lowered, benefiting everyone

and GEOGARD® Seam Sealer*)

GREEN PRODUCT CHOICES: IT'S OUR NATURE.

Tremco Roofing's restoration systems were environmentally friendly long before the sustainable or "green" bandwagon came to town.

From the first product – ALUMANATION® 301 – through our entire line, every restoration system is by nature a green choice because it's an alternative to roof tear-off. Besides keeping roofing materials out of landfills, restoration minimizes the use of (and exposure to) airborne VOCs. We offer low-VOC, and low odor formulations.

Tremco Roofing's reflective restoration systems dramatically reduce energy consumption while diminishing the carbon footprint, and protect indoor air quality by preventing moisture infiltration. That's good for the environment and for your occupants, and a major reason why businesses in every industry including manufacturing, educational systems, hospitals, property management, transportation, and tourism have been our customers for generations.

*With Tremco's
rock-solid reputation
for long-lasting
waterproofing,
thousands of
businesses entrust us
to protect millions
of square feet
of roofing.*

INSTALLS FAST. MADE TO LAST.

To give you the best warranty in the industry, we work hard to ensure the best system and installation in the industry. So we take our quality commitment seriously; our company-wide ISO 9001:2008 certification proves it.

We manufacture and test our own coating formulations and roof membrane systems. Every order is compounded just-in-time and shipped when the job is scheduled to begin. Our systems have as few components as possible, making them contractor-friendly for fast, easy and reliable installations.

THE BEST TECHNICAL SUPPORT – OURS.

Tremco Roofing conducts comprehensive, hands-on training for registered contractors across the country. And we support them with a full-time staff of technical experts. From specification reviews to inspections before and during the job, and upon completion, we're here for every crew – and your investment – every step of the way.

OWNERS RELY ON TREMCO, TIME AFTER TIME.

Tremco Roofing's restoration systems are engineered to exceed performance expectations, and meet the requirements of state, regional and federal codes as well as FM Global and UL ratings. Independent testing validates their strength, longevity, durability and trustworthiness.

But the most important validation comes from our 20+ year relationships with owners of multiple buildings who insist on Tremco Roofing for every roof and wall they own.

AS RELIABLE AS THE SUNRISE.

Of course, a warranty is only as good as the company that covers it. Few manufacturers can match the reliability, strength and decades of leadership that support every Tremco warranty. With more than 80 years of successful installations, you can count on Tremco Roofing to support our warranties – and your building's integrity – well into the future.

We provide products and services for roof and wall restoration under the brand names of ALPHAGUARD[®], ALUMANATION[®] 301, ECOLASTIC[®], GEOGARD[®], ICE, ROCK-IT[®], SOLARGARD[®] and TREMLASTIC[®]. Our products offer long-term performance and energy savings to ensure that customers have the right solution to meet their specific restoration needs.

Tremco Roofing has been a leader in the roof coating and restoration industry since 1928.
