TREMCO ROOFING'S GUIDING PRINCIPLES SUPPORT SUSTAINABILITY

RESTORING ROOFS HAS BEEN AT THE FOREFRONT OF OUR PHILOSOPHY SINCE 1928

Our liquid applied roofing systems with reflective surfaces help building owners and managers meet their sustainability goals by extending the lifecycles of their facilities while helping lower energy use and operating costs because:

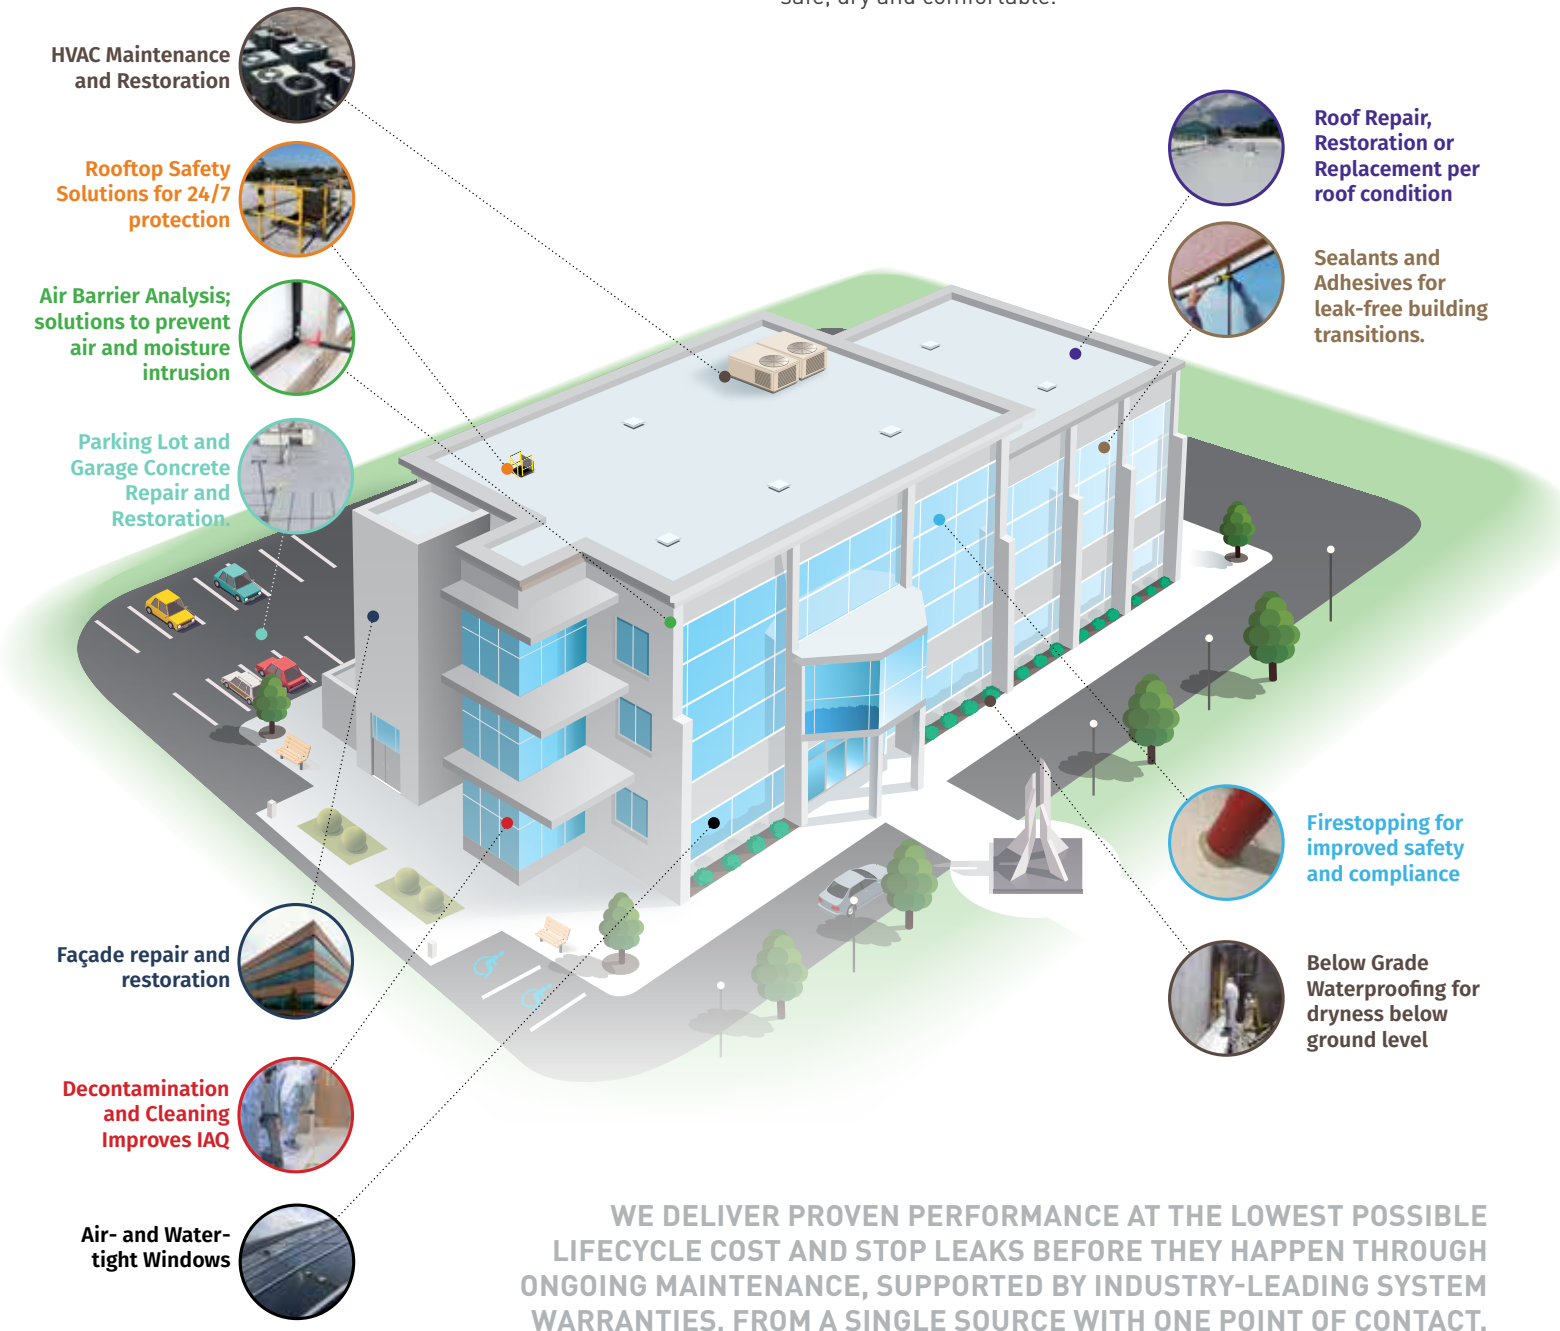

- They prolong the service life of structures for years
- These systems are cost-effective over a second roofing layer, complying with building codes, and postponing replacement for years
- There's no tear off, which eliminates landfill issues and fees and does not disrupt building occupants
- Reflectivity reduces energy consumption, the strain on HVAC systems, and a building's carbon footprint
- The Urban Heat Island Index is lowered, benefitting everyone

Tremco Roofing is committed to sustainability and its impact on facilities and the people who use them. Our products, systems and processes help our customers develop and maintain sustainable, high-performance buildings that last longer, cost less to operate, and contribute to a healthier planet. Focusing on restoration, renovation and repair supports our belief that the most sustainable buildings are the ones that already exist.

THE INDUSTRY'S ONE GROUP to Provide Systems and Services for All Six Sides of the Building

Tremco Roofing is part of Tremco Construction Products Group (Tremco CPG), whose companies have solutions and services for all six sides of your building envelope.

Whether it's restoration, replacement or new construction, our comprehensive systems can improve weatherproofing and energy efficiency, give an aging structure a brand-new look, extend a facility's usable life, and help make buildings safe, dry and comfortable.

WE DELIVER PROVEN PERFORMANCE AT THE LOWEST POSSIBLE LIFECYCLE COST AND STOP LEAKS BEFORE THEY HAPPEN THROUGH ONGOING MAINTENANCE, SUPPORTED BY INDUSTRY-LEADING SYSTEM WARRANTIES, FROM A SINGLE SOURCE WITH ONE POINT OF CONTACT.

LIQUID APPLIED ROOFING SYSTEMS

SOMETIMES, THE EASIEST CHOICES ARE REALLY EASY

LIKE RESTORING INSTEAD OF REPLACING YOUR ROOFS WITH TREMCO'S LIQUID APPLIED ROOFING SYSTEMS

LIQUID APPLIED ROOFING SYSTEMS

FOR RESTORATION, REPLACEMENT AND NEW CONSTRUCTION

ALPHAGRADE™

AlphaGrade is a unique, three-coat system to restore gravel-surfaced roofs. It locks the gravel in place, eliminating damaging wind-born debris, and provides a new, waterproof covering that also helps the environment and reduces stress for building occupants.

ALPHAGUARD™ BIO

AlphaGuard BIO is an odorless, reinforced roofing and waterproofing system distinguished by its high bio-based content. It is ideal when there is a demand for high-performance roofs but where odor is not allowed, such as school and hospital projects.

ALPHAGUARD™ MTS

AlphaGuard MTS is a very low-odor, fully reinforced roofing and waterproofing system used to restore or replace existing roofs. It is easily applied, highly versatile, durable, technologically advanced and provides a seamless, waterproof roof system.

ALPHAGUARD™ PUMA MODIFIED POLYURETHANE/METHYL METHACRYLATE

AlphaGuard PUMA can be used for roof restoration, replacement, or new construction. It's ideal when you need a roofing solution that can be installed efficiently even in sub-zero weather, cures quickly, and waterproofs completely.

ALUMANATION® 301

Alumanation 301 protects metal roofs and walls from rust and corrosion, eliminating the need for costly metal panel replacement. Its bright surface and high reflectivity lowers rooftop temperatures and energy use. Alumanation 301 typically performs for 12-15 years before recoating.

GEOGARD®

Geogard is a proven urethane restoration system that extends roof life. It bonds directly to numerous substrates, including single ply, MB/BUR, metal, and polyurethane foam roofs, and can be used to repair roof blemishes.

SOLARGARD® 6083

Solargard 6083 is a water-based restoration system that provides durability, low temperature flexibility, and excellent resistance to weathering and dirt pick-up over a variety of roofing substrates. It is available in white and 16 colors.

SOLARGARD® HY-BUILD

Solargard Hy-Build coating is versatile; able to restore metal roof systems; and patch, repair, seal, protect and beautify concrete, masonry, brick, and stucco walls. It resists yellowing and chalking, and reflects up to 85% of the sun's harmful rays.

ADDITIONAL LIQUID APPLIED SOLUTIONS FOR A WIDE VARIETY OF ROOFING NEEDS

ECOLASTIC: Maintains weathered, dry roof membranes and improves self-healing of coal tar pitch; surfacing adhesive for new asphalt and gravel construction.

ICE COATING: Versatile coating to restore single ply roof membranes such as EPDM, CSPE, PVC and PIB, as well as spray polyurethane foam and smooth MB roofs.

ROCK-IT® ADHESIVE: Highly reflective adhesive combines uniquely with white marble aggregate to ensure a fully reflective surfacing.

SOLARGARD ACRYTHANE: Offers excellent resistance to corrosion, humidity, and UV rays; enhances a building's appearance with a rich, color-fast, semi-gloss finish coat.

TREMLASTIC: Seals the roof surface and enables the application of our coating products.

ROOF RESTORATION

SOLVE PROBLEMS, SAVE MONEY, REDUCE HEADACHES

Restoring aging but still functional roofs with a liquid applied roofing system instead of replacing them is an economical solution to roofing problems. The system's tough shield resists ultraviolet rays and water damage; owners see impressive cost savings, increased sustainability, and years of headache-free performance. The same benefits apply to wall restoration.

Tremco's roof and wall restoration systems are developed under strict quality standards and warranted for years to ensure your trust. We've built our reputation by providing the right solution to facility problems through our combination of people, products, and services, which work together to protect your building assets against the elements.

In addition to the systems described here, we have roofing solutions for literally every need. Scan the QR code below to find your nearest Tremco Roofing sales representative to learn more about our exceptional range of roof and wall systems, our maintenance offerings, and our unique managed asset approach.
