8 Years of Experience

Serving Northwest Ohio Southern Michigan and Northern Indiana

Our 40+ member team focuses on the long-term -- protecting and extending the life of our customers' roofs and building envelopes to ensure that they perform well for decades while saving the customer money. This means developing plans to manage and maintain the roofs, and looking for ways restore roofs as opposed to replacing them; roof restoration will generally cost 50 to 60% less than a new roof and comes with an extensive warranty.

As a result, we support more than 110 customers across three states, including healthcare systems, K-12 school corporations, colleges and universities, utilities and manufacturing facilities. They have entrusted us by placing thousands of their roofs under warranty, representing nearly eight million square feet.

In short, we follow a very simple rule - to treat our customers like we like to be treated!

Collaboratively led with my colleagues Clint Beasley and Doug Copley, our team includes an architect (AIA), a Registered Roof Observer (RRO), a Construction Document Technician (CDT), a Registered Roof Consultant (RRC), an RRC in training, QC support and over 30 roof repair technicians. This depth enables us to respond faster to our customers' needs wherever they are, more thoroughly and at a lower cost. With such a wide variety of expertise and more than 600 years of combined experience, we can proactively perform a wide range of services including:

- Leak repair on any type of roof
- Roof, window-wall and parking structure inspections
- Comprehensive reports that catalog a customer's building envelope inventory
- Diagnostics such as roof thermography (infrared scans), moisture probes and water testing
- Roof cleaning using a proprietary environmentally friendly, water reclamation system
- Specification, roof drawings and bid document preparation
- Five- to 10-year roof budgets
- Pre-bid meeting assistance
- Pre-construction meeting assistance
- Job site inspection
- Project management
- Job site inspection
- Roof Restoration
- Roof Replacement
- Moisture intrusion tests on the walls and windows
- Air barrier tests for walls
- Parking garage repair and rehabilitation
