Working Together to Reduce Roofing Risk

December 4th 7:30 a.m. - P12:00 p.m.
Presented by Factory Mutual Global, Tremco
Incorporated, and Weatherproofing Technologies, Inc.

Speaker Bios

Rick F. Matarrese, P.E.

Senior Engineering Specialist

Factory Mutual Insurance Company

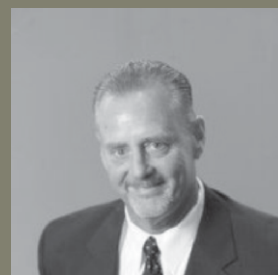

Rick has worked with FM Global since Graduating from Auburn University in 1980. His primary responsibility is serving the operations center as an engineering technical specialist and providing guidance, assistance and mentoring of field staff for complex engineering occupancies while providing engineering office support to plan review for technically challenging submittals. A secondary role for Rick is field engineering as designated service provider for several larger and more complex locations and as project coordinator for large construction projects of our insured for serviced locations.

Mary Ann Uhlmann

Architectural Assistant

Tremco Incorporated

As an Architectural Assistant for Tremco Roofing & Building Maintenance, Mary Ann provides building design professionals with sustainably responsible roofing product and system options. With experience from involvement in a large and diverse assortment of roofing projects across the United States, including a specialization in vegetative roofing, she is able to offer her clients successful, customized, high performance solutions while striving to enhance the livability and sustainability of our cities and communities.

Jim Lohmann, RRC, RRO, CDT, GRP

Registered Roof Consultant

Tremco Incorporated

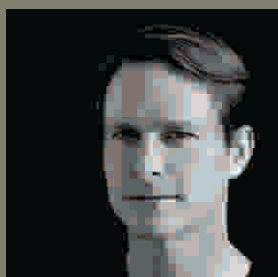

From hospitals, schools, colleges and universities, to federal and state agencies and complex manufacturing facilities, Jim has provided 'roofing and weatherproofing peace of mind' to his clients throughout North Georgia for more than twenty five years. As the preferred consultant for roof repair, restoration and replacement, he has always delivered a level of customer commitment and technical expertise unsurpassed in the roofing industry.

Jim Solether

Market Director, Services

Tremco Incorporated

In Jim's twenty-five year career, he's gained valuable experience in sales, marketing, management and finance within a variety of industries. He joined Tremco in 2003 and has been key in growing the United States services business and subsequently lead Tremco's Roofing and Building Maintenance Business Operations. Currently, Jim is in charge of enhancing Tremco's Peace of Mind proposition through the strategic development of roof top fall protection products and services throughout North America.

Michael Cohen

President

Industrial SkyWorks

Michael is an Airline Rated Captain (Boeing 737 NG) and holds a Master of Aeronautical Sciences: Aviation Safety Systems degree from Embry-Riddle Aeronautical University and is a certified aircraft accident investigator. An expert in aircraft safety systems and risk management, Michael has served in various roles on behalf of a number of airlines and organizations. These include Chairman of Air Safety, member of an Occupational Health and Safety Committee, and member of an Airline Emergency Response Team.
