Personal Philosophy

I provide long-term, quality roofing solutions for my clients based on data review and a careful analysis of their situation. I believe that each customer has specific needs; and there is not one type of solution or product that is right for all conditions. My primary goal is to commit to long-term relationships and to do what is right for the customer.

Expert Qualifications

- Extensive experience in developing specifications and details for new construction roof projects, re-roofs, restorations, and roof repairs
- Expert at extending the life of current building assets and saving customers money in future repair and replacement costs
- Personally manage more than 10 million square feet of roofing
- Implemented roof asset management programs for a variety of clients, including hospitals, municipalities, K-12 school districts, and universities

Professional Affiliations

- National Roofing Contractors Association (NRCA)
- California Society for Healthcare Engineering (CSHE)
- American Institute of Architects (AIA)
