

# Roof Repair

AND MAINTENANCE PROGRAM

**STOP LEAKS. REPAIR IMPERFECTIONS.  
MAXIMIZE ROOF ASSETS.**

Your roof and building assets experience abuse every day from weather, movement, modifications and traffic. As roofs age, minor problems may occur such as tears and splits in the roof membrane, and cracks and deterioration of the walls. Although these defects may not be severe, if not repaired promptly they can become major problems and lead to a large capital expense.

WTI can provide professional crews to handle these maintenance issues for you. Offering timely service, superior workmanship and quality materials, our dedicated repair crews are available on either a contract or time-and-materials basis to meet your budgetary needs.

## Advantages Of Using WTI's Maintenance Crews

- **Comprehensive up-front estimates**
- **Quality assurance of all materials and labor**
- **Dedicated personnel to handle patch and repair work**
- **Timely scheduling of work**
- **All employees are OSHA 10 certified**
- **Established safety equipment and PPE distribution program for all field personnel**

In addition, our crews perform a variety of roofing and building maintenance services:

- **Flashing Repairs and Installation**

The most common reason for premature roof failure is flashing problems. Our crews will repair or replace failing flashings with reinforcement membranes designed to be compatible with your roof system.

- **Drain and Curb Installations**

Ponding water may also cause roof deterioration. Installing new drains may alleviate this problem.

- **Emergency and Non-emergency Leak Repairs**

Our crews are available to quickly repair any leaks, minimizing damage to your building and assets.

- **Annual Roof Cleaning and Maintenance**

Roof systems should be inspected and maintained regularly. We are available to inspect and clean your roof and its components.

- **Joint Sealing**

Extreme weather changes, age and other problems can create cracks or open joints in your parapet walls and concrete surfaces. This can allow water to infiltrate your roof and building. Our crews can make these repairs before damage becomes a problem.

**Flashings, blisters and other defects are corrected and reinforced so that they are stronger than the original.**
