4. First-aid measures

Description of necessary first-aid measures

| Inhalation: | Move to fresh air. |
|---------------|--|
| Skin Contact: | Take off immediately all contaminated clothing. Wash skin thoroughly with soap and water. If skin irritation occurs: Get medical advice/attention. |
| Eye contact: | Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Get medical attention. |

| Ingestion: | Call a POISON CENTER/doctor if you feel unwell. Rinse mouth. | | | |
|--|--|--|--|--|
| Personal Protection for First- aid Responders: | Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. | | | |
| Most important symptoms/effect | cts, acute and delayed | | | |
| Symptoms: | Respiratory tract irritation. | | | |
| Hazards: | No data available. | | | |
| Indication of immediate medica | I attention and special treatment needed | | | |
| Treatment: | Symptoms may be delayed. | | | |
| 5. Fire-fighting measures | | | | |
| General Fire Hazards: | Use water spray to keep fire-exposed containers cool. Water may be ineffective in fighting the fire. Fight fire from a protected location. Move containers from fire area if you can do so without risk. | | | |
| Suitable (and unsuitable) exting | guishing media | | | |
| Suitable extinguishing media: | Use fire-extinguishing media appropriate for surrounding materials. | | | |
| Unsuitable extinguishing media: | Avoid water in straight hose stream; will scatter and spread fire. | | | |
| Specific hazards arising from the chemical: | Vapors may travel considerable distance to a source of ignition and flash back. Vapors may cause a flash fire or ignite explosively. Prevent buildup of vapors or gases to explosive concentrations. | | | |
| Special protective equipment a | nd precautions for firefighters | | | |
| Special fire fighting procedures: | No data available. | | | |
| Special protective equipment for fire-fighters: | t Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. | | | |
| 6. Accidental release measur | es | | | |
| Personal precautions, protective equipment and emergency procedures: | Ventilate closed spaces before entering them. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Keep upwind. | | | |

| Methods and material for containment and cleaning up: | Dam and absorb spillages with sand, earth or other non-combustible material. Collect spillage in containers, seal securely and deliver for disposal according to local regulations. | | |
|---|---|--|--|
| Environmental Precautions: | Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water sources or sewer. | | |
| 7. Handling and storage | | | |
| Handling | | | |
| Technical measures (e.g. Local and general ventilation): | Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of vapors and mist. Mechanical ventilation or local exhaust ventilation may be required. | | |
| Safe handling advice: | Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. Use personal protective equipment as required. Avoid contact with eyes. Wash hands thoroughly after handling. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Ground and bond container and receiving equipment. Take precautionary measures against static discharges.Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices. | | |

Biological Limit Values

| | Chemical Identity | Exposure Limit Values | Source | |
|--|----------------------------|---|---------------------|--|
| Xylene (Methylhippuric acids: Sampling time: End of shift.) | | 1.5 g/g (Creatinine in urine) | ACGIH BEI (03 2013) | |
| Appropriate Engineering Controls | | Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of vapors and mist. Mechanical ventilation or local exhaust ventilation may be required. | | |
| Indiv | vidual protection measures | , such as personal protective equipment | | |
| General information: | | Provide easy access to water supply and eye wash facilities. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Use explosion-proof ventilation equipment. | | |
| Eye/face protection: | | Wear safety glasses with side shields (or goggles). | | |
| Skin Protection Hand Protection: | | Use suitable protective gloves if risk of skin contact. | | |
| Other: | | No data available. | | |
| Respiratory Protection: | | In case of inadequate ventilation use suitable respirator. Seek advice from local supervisor. | | |
| Hygiene measures: | | Observe good industrial hygiene practices. Wash hands before breaks and immediately after handling the product. Avoid contact with eyes. When using do not smoke. Do not handle until all safety precautions have been read and understood. Obtain special instructions before use. | | |
